

PRINCE

Full Stack Developer | MERN Stack Developer

+91 8264295936 | digraprince7@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Github](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with strong expertise in MERN Stack development, scalable web applications, and modern frontend architectures. Experienced in building production-ready business platforms, e-commerce systems, and clouddeployed backend services using React.js, Node.js, Express.js, MongoDB, TypeScript, and AWS. Skilled in API integrations, authentication systems, containerized deployments, background job processing with worker queues, large-scale data handling, and performance optimization. Passionate about delivering high-quality digital experiences with strong attention to UI/UX, scalability, and application performance.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Next.js

Backend: Node.js, Express.js, Python, FastAPI, REST APIs, WebSockets, JWT Authentication, BullMQ (Job Queues / Worker Processes)

Database: MongoDB, PostgreSQL, Mongoose, SQL

Cloud & DevOps: AWS (ECS, Fargate), Git, GitHub, Docker, CI/CD, Postman

Hosting & Platforms: Vercel, Render, Hostinger

Concepts: Responsive Design, API Integration, State Management, Authentication & Authorization, Background Job Processing, Asynchronous Processing, Large-Scale Data Handling, Performance Optimization, Error Handling, Clean & Scalable Architecture

EDUCATION

Sardar Beant Singh State University — B.Tech in Computer Science and Engineering (CSE)	2025
- CGPA: 9.32 - Key Achievement: GATE 2025 Qualified	
Jawahar Navodaya Vidyalaya — 12th Standard (Non-Medical)	2021
Percentage: 94.8%	
Himalaya Modern Senior Secondary School — 10th Standard	2019
Percentage: 96.4%	

PROFESSIONAL EXPERIENCE

75WAY Technologies Private Limited — Associate Software Development Engineer	Jan 2025 – Present
Mohali, Punjab	
- Developed scalable MERN stack applications with reusable frontend components and optimized backend APIs for enterprise-level systems. - Collaborated with cross-functional teams to improve application performance, UI responsiveness, and implemented secure authentication and scalable workflows.	
Solitaire Infosystem Pvt. Ltd. — Node.js Intern	Jun 2024 – Aug 2024
Mohali, Punjab	
Developed RESTful APIs and backend workflows using Node.js, Express.js, and MongoDB for scalable CRUD functionalities.	

- Integrated secure frontend-backend communication and improved backend performance through optimized database handling.

Solitaire Infosystem Pvt. Ltd. — React.js Intern

Jun 2023 – Aug 2023

Mohali, Punjab

- Developed reusable and responsive React.js components using hooks and modular architecture principles.
- Integrated APIs and optimized frontend rendering for enhanced user experience and faster application performance.

KEY PROJECTS

Inception Financial — Solar Panel System Arrangement Platform — [Live Site](#) | [Admin Portal](#)

Technologies: Next.js, React.js, Node.js, Express.js, MongoDB, AWS Fargate, BullMQ, Tailwind CSS, Bootstrap

- Developed a comprehensive solar panel system arrangement and management platform using Next.js and the MERN stack for renewable energy project tracking, optimization, and client management.
- Architected and deployed containerized backend services on AWS Fargate, enabling auto-scaling, zero-downtime deployments, and reliable handling of production traffic.
- Implemented BullMQ-based worker queues to process background jobs — report generation, notifications, and data syncs — asynchronously and reliably at scale.
- Designed data handling and processing workflows for large volumes of solar installation and performance data, optimizing MongoDB queries, indexing, and aggregation pipelines for speed and reliability.
- Built responsive admin/client dashboards with Tailwind CSS & Bootstrap for real-time monitoring, installation tracking, and performance analytics; implemented secure authentication and scalable REST APIs.

Parcel Hanger — Logistics Management Platform — [Live Site](#)

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a parcel and logistics management system with package tracking, admin dashboards, user management, and real-time scalable APIs for efficient operations.
- Optimized responsive layouts and backend performance for seamless cross-device user experience and status updates.

Nexify India — E-Commerce Platform — [Live Site](#)

Technologies: React.js, Node.js, Express.js, MongoDB, Bootstrap

- Developed a scalable e-commerce platform with an admin dashboard, product management, order tracking, secure authentication, and efficient REST APIs with MongoDB integration.

Hair Skin Luxe — Luxury Brand Website — [Live Site](#)

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Material UI

- Developed a premium luxury brand website with modern UI/UX, responsive mobile-first layouts, smooth animations, and optimized frontend performance for high-end customer engagement.
- Integrated scalable backend workflows and SEO-friendly architecture to improve website visibility and conversion performance.

EXTRA CURRICULAR ACTIVITIES

- House Captain at Jawahar Navodaya Vidyalaya, leading student coordination programs and inter-house activities.
- Executive Member of ISTE (Indian Society for Technical Education), organizing technical workshops and innovation-focused events.
